

The grammar of the ALGO syntax

PARSE ::= ALGO . EOF

ALGO ::= "ALGORITHM" . "(" . IDENT . ")" . BLOCK

BLOCK ::= "{" . SEQUENCE . "}"

SEQUENCE ::= (STATEMENT)*

STATEMENT ::=
| DECL ";"
| EXPR ";"
| ASSIGNMENT ";"
| IFTE
| RETURN ";"
| WHILEDO

RETURN ::= "return" . EXPR

EXPR ::=
| "(" . EXPR . ")"
| E1 . opt_BINOP_EXPR

opt_BINOP_EXPR ::=
| epsilon
| BINOP . EXPR

ASSIGNMENT ::= IDENT . BINASSIGN . EXPR

DECL ::= (SIGN | epsilon) . (PRE_TYPE | epsilon) . TYPE . IDENT . opt_DECL . ("," . IDENT .

opt_DECL ::=
| epsilon
| BINASSIGN . EXPR

IFTE ::= "if" . "(" . EXPR . ")" . (BLOCK | EXPR . ";") . opt_ELSE

opt_ELSE ::=
| epsilon
| "else" . (BLOCK | EXPR . ";")

WHILEDO ::= "while" . "(" . EXPR . ")" . BLOCK

E1 ::=
| VALUE

```

    | IDENT . opt_E1
    | PRE_POST_OP . IDENT
    | PTR . IDENT
    | FUNCTION

FUNCTION ::= IDENT . "(" . (epsilon | ARGS) . ")"

ARGS ::= EXPR . opt_ARGS

opt_ARGS ::=
    | epsilon
    | "," . ARGS

opt_E1 ::=
    | PRE_POST_OP
    | ("[" . EXPR . "]" ) *

PRE_POST_OP ::= "++" | "--" | "!"

PTR ::= "*" | "&"

IDENT ::= (LOWERCASE | UPPERCASE | "_" )+ . (LOWERCASE | UPPERCASE | "_" | DIGIT) *

VALUE ::=
    | INTEGER
    | FLOAT
    | CHAR
    | STRING
    | BOOLEAN

INTEGER ::= (DIGIT) +

FLOAT ::=
    | (DIGIT) + . "." . (DIGIT) *
    | (DIGIT) * . "." . (DIGIT) +

CHAR ::= "'" . (ASCII | epsilon) . "'"

STRING ::= "" . (ASCII) * . ""

ASCII ::= All characters in the ASCII table !! WITH "\\" AND NOT "\" !!

BOOLEAN ::= "true" | "false"

BINOP ::= "/" | "!=" | "==" | "|" | "+" | "-" | "*" | "%" | "<"
    | ">" | "<=" | ">=" | "&&" | "||" | "<<" | ">>"

```

`BINASSIGN ::= "=" | "!=" | "+=" | "-=" | "*=" | "&=" | "|=" | "<=" | ">="`

`TYPE ::=`
| `"bool"`
| `"int"`
| `"char"`
| `"string"`
| `"long"`
| `"double"`
| `"float"`

`SIGN ::= "unsigned" | "signed"`

`PRE_TYPE ::= "long" | "short"`
